The screenshot shows the Databrowse web interface for the Iowa State University Thermography Research Group. The browser address bar shows the URL <https://pequod.cnde.iastate.edu/databrowse/>. The page header includes navigation links for CyMail, Outlook, Blackboard, and AccessPlus, along with an alphabetical directory index and links for Directory, Maps, and Contact Us. The main content area displays a file system tree for the path `/sata4/shared`. A right-click context menu is open over the `contamination` folder, listing actions such as 'Open Folder in New Tab', 'Open Folder in SFTP Client', 'Get Link to this Folder', 'Start Checklist Here', 'Upload File Here', 'New Folder Here', 'Rename Folder', 'Move Folder to Trash', and 'Folder Properties'. A search bar is located in the top right corner of the page.
