

1 Inline Markup

Paragraphs contain text and may contain inline markup: *emphasis*, **strong emphasis**, inline literals, standalone hyperlinks (<http://www.python.org>), external hyperlinks (Python), internal cross-references (*example*), external hyperlinks with embedded URIs (Python web site).

Literal blocks are indicated with a double-colon ("::") at the end of the preceding paragraph (over there -->). They can be indented:

```
if literal_block:
    text = 'is left as-is'
    spaces_and_linebreaks = 'are preserved'
    markup_processing = None
```

2 Table

| Inputs | | Output |
|--------|-------|--------|
| A | B | A or B |
| False | False | False |
| True | False | True |
| False | True | True |
| True | True | True |
